multiple conditions, the most significant comorbidity was Mental Health and Substance Use (132). When taking severity of condition into account, 300 adults reported conditions that met the criteria to be considered a disability.

Sub-Populations – All Programs

72 (10.5%) individuals over 18 met the criteria for chronic homelessness at the time of project entry.^v 1 out of every 6.1 adults receiving services this quarter was a veteran (16.5%). Out of the 113 veterans served, 51 (45.1%) reported a disabling condition and 7 (6.2%) met the criteria for chronic homelessness at admission.

Data quality and completeness play a major role in ensuring that the System Performance Measures accurately reflect the work being done within the CoC. CARES routinely tracks the health of HMIS data and this information may be found at www.caresny.org.

ⁱ Data breakdowns for subsequent categories may total less than this number due to differences in data reporting across funders, as well as data completeness. Information on **reporting methodology** and on **data completeness**, may be found at www.caresny.org

ⁱⁱ For the purposes of this report, any RRH enrollments are considered residential. Persons are counted once in Residential **AND** once in Supportive Services Only if served by both.

ⁱⁱⁱ Data based on current age and household composition, which may differ from information reported at admission

^{iv} This measure includes individuals across all project types

^v Please note that HMIS began using HUD's new definition of chronic homelessness effective 10/1/2015 and all individuals in program on or after that date are measured using this new definition, even if their program start date was prior to the change in definition taking effect.
