[i] Data breakdowns may total less than this number due to differences in data requirements across funders as well as data completeness. Information on reporting methodology and on data completeness may be found at www.caresny.org/.

[ii] RRH enrollments are considered residential.

[iii] For 'Persons Served' numbers only: if an individual client is served by **BOTH** Residential and Supportive Services programs within the same report period, the client is counted once in **EACH** total; therefore, adding these numbers may equal more than the total unduplicated number of persons.

[iv] Data based on **current** age and household composition, which may differ from information reported at admission.

[v] Clients may self-identify up to 5 race categories in HMIS; for this report, all clients self-identifying with more than one race are grouped together into the "Multiple Races" category.

[vi] HUD collects Ethnicity information under the rationale: "To indicate clients who do and do not identify themselves as Hispanic or Latino."

[vii] Please note that HMIS began using HUD's new definition of chronic homelessness effective 10/1/2015 and all individuals in program on or after that date are measured using this new definition, even if their program start date was prior to the change in definition taking effect.

[viii] Using the HUD definition of a disabling condition; please see the most recent HUD HMIS Data Standards Manual for further information.
