

# Methodology for NY-520 - Franklin, Essex Counties CoC

## Sheltered Population Total

**1. What data source(s) was used to produce the total number of people included in the sheltered population (staying in an emergency shelter, Safe Haven, or transitional housing) on the night of the count? Please indicate the percentage of the PIT count derived from each of the sources. (If a source was not used, please enter zero).**

HMIS Data	50%
Provider-level surveys	50%
Client-level surveys	0%
Observation	0%
Other	0%
<b>Total</b>	<b>100%</b>

**2. Was the CoC able to collect information about the number of people being sheltered on the night of the count from all emergency shelters, Safe Havens, and transitional housing projects listed on the HIC or only some? listed on your HIC or only some?**

- Complete census count

**3. What information or method(s) was used to de-duplicate the count of the total number of people included in the sheltered population?**

- Comparison of personally identifying information (PII), such as name, date of birth, and Social Security Number
- Blitz count of persons in shelters (i.e., count occurred at same time to avoid double counting)
- Interview/survey question(s) with screening questions (e.g., have you already completed a count survey)

## Sheltered Subpopulation

**4. What data source(s) was used to produce the demographic and subpopulation data included in the sheltered population (staying in an emergency shelter, Safe Haven, or transitional housing) on the night of the count? (select all that were used)**

- HMIS Data
- Provider-level surveys

Point In Time Methodology for NY-520 - Franklin, Essex Counties CoC

- Client-level surveys

**5. Was the CoC able to collect information about the demographic and subpopulation characteristics of all sheltered people or only some?**

- All sheltered people

**6. Looking at the change in your sheltered count from last year's count, please choose up to three reasons that best explains these changes from the drop down list below.**

- Increased or improved PIT count training
- Weather

**Please provide a brief description of these specific factors (500 word limit):**

The major reasons that best explains the change (a net increase of 18 persons) in the sheltered count from last year's count are: (1) increased or improved PIT count training and (2) weather.

Increased or improved PIT count training: This year, in coordination with the Collaborative Applicant and the HMIS Lead, the community was trained on PIT requirements and was provided training on HMIS data clean up to ensure PIT data quality. The CA also provided additional one-on-one technical assistance to agencies that are not within the HMIS on how to collect data and complete required forms. This improved training led to a more accurate and complete count.

Weather: On the night of the count the temperature dropped to a recorded low of 8 degrees. Due to below freezing temperatures the NYS Code Blue Executive Order was in effect. Code Blue requires local counties to shelter all persons/households regardless of sanctions or other eligibility requirements that would otherwise be a barrier for shelter.

## **Unsheltered Population**

**7. What approach(es) was used to count the total number of people included in the unsheltered population during the PIT count. (select all that were used)**

- "Night of the count" - complete census
- "Night of the count" - known locations

- Service-based count

**7a. Were certain areas within the CoC geography specifically excluded because the CoC had reason to believe there were no unsheltered people in those areas?**

No

**7c. In areas that were canvassed, did the CoC count all unsheltered people in those areas or a sample of people?**

- All people encountered during the count

**8. What information or method(s) was used to de-duplicate the total count of people in the unsheltered population? (Check all that apply)**

- Comparison of unique client identifiers (not PII)
- Blitz count of unsheltered people (i.e., canvassing of different areas occurred at same time to avoid double counting)

Point In Time Methodology for NY-520 - Franklin, Essex Counties CoC

- Interview/survey question(s) with screening questions (e.g., have you already completed a count survey)

## **Unsheltered Subpopulations**

### **9. What approach(es) was used to collect demographic and subpopulation data about unsheltered people included in the unsheltered population during the PIT count?**

- Surveys/interviews of people identified as unsheltered on the night of the PIT count

### **10. Were all people who were encountered during canvassing on the night of the count or during post night of the count PIT activities asked to complete a survey/interview?**

- All people encountered were surveyed

### **11. What information or method(s) was used to produce an unduplicated total count of homeless people across your sheltered and unsheltered populations?**

- Comparison of unique client identifiers (not PII)
- Blitz count of unsheltered people (i.e., sheltered and unsheltered counts occurred at same time to avoid double counting)
- Interview/survey question(s) with screening questions (e.g., have you already completed a count survey)

### **12. Looking at the change in your unsheltered count from last year's count, please choose up to three reasons that best explains these changes from the drop down list below**

- Increased or improved PIT count training
- Change in awareness of PIT count and relevant resources

### **Please provide a brief description of these specific factors (500 word limit):**

The three reasons best explaining the change (a net decrease of three persons) in the unsheltered count from 2019 to 2020 include increased or improved PIT count training, and enhanced awareness of the PIT count and relevant resources.

Increased or improved PIT count training: This year additional volunteers were trained more effectively to ensure de-duplication and appropriate interviewing techniques. In addition, the Collaborative Applicant facilitated phone meetings which included the unsheltered PIT Lead Agencies hosting homeless events to ensure a more accurate and complete count.

Change in awareness of PIT count: During this year's regional unsheltered PIT Lead Agency meetings, the Collaborative Applicant facilitated discussion on how to best engage additional service partners (including veteran providers who are not CoC funded) to participate in the unsheltered PIT, which led to a more accurate and complete count.
