## Introduction

---

Each CoC across the country is required to submit the HMIS Longitudinal System Analysis (LSA) at the end of each federal fiscal year. Every CoC's LSA submission is then compiled into the Annual Homeless Assessment Report (AHAR) given to Congress. It provides nationwide estimates of homelessness, including information about the demographic characteristics of homeless persons, service use patterns, and the capacity to house homeless persons. It informs strategic planning for federal, state, and local initiatives designed to prevent and end homelessness.

At the local level, the LSA can also be used by communities who want to better understand the number, characteristics, and service needs of people using homeless services for their CoC application, community planning activities, coordinated entry system planning, strategic plans to end homelessness, consolidated plans, or funding applications. The Cares Collaborative HMIS has modified the HMIS Annual Report to use the LSA data in order to ensure that the data being used in all reporting formats retains consistency and aligns with the HUD data visualization and reporting system [Stella](#). More information about the LSA can be found [here](#).

The NY-523 Glens Falls, Saratoga Springs/Saratoga, Washington, Warren, Hamilton Counties CoC LSA is a deduplicated report generated from client reported data entered in the CARES Collaborative HMIS (CCHMIS) by the Continuum's Contributing Homeless Organizations (CHOs), as listed in Appendix B. If a CoC does not have 100% HMIS participation from Homeless Services Providers (other than providers that are *\*prohibited* from HMIS participation) this report is not 100% reflective of the community.

*\*Domestic Violence projects are prohibited by law from participation in the Homeless Management Information System (HMIS) and are not included in this report.*

## Reading this Report

---

For those people and households served by continuum projects during the fiscal year, the LSA includes:

- Demographic characteristics like age, race, gender, and veteran status
  - The LSA reports demographic data for Heads of Household and adults only.
  - Children Only Households do not report on veteran status.
- Length of time homeless and patterns of system use.
- Information specific to populations whose needs and/or eligibility for services may differ from the broader homeless population, such as veterans and people and households experiencing chronic homelessness; and
- Housing outcomes for those who exit the homeless services system.

More detailed demographic data can be found in the tables throughout this report separated by the three HUD defined household types:

- Adults and Children (under 18) - AC
- Adults Only (all household members at least 18 years of age) - AO

- Children Only (all household members are under 18 years of age, including parenting teens) - CO

Within each table, the total numbers reported for each data point are separated by the following HMIS Project Groups:

HMIS Project Type	
Emergency Shelter – E	Residential project types in which all clients are homeless while enrolled. Demographics for clients served in these three project types are reported in the combined E/S/T project group
Safe Haven – S	
Transitional Housing - T	
Permanent Supportive Housing - PSH	Permanent supportive housing for formerly homeless people. <ul style="list-style-type: none"> <li>▪ PSH clients who are homeless at project entry based on 3.917 Living Situation are considered to be experiencing homelessness until a documented 3.20 Housing MoveIn Date or exit, whichever comes first.</li> <li>▪ For clients who were in ES/SH or on the street at project entry, all time between Approximate Date Started and move-in is counted in determining chronic homelessness. A client may not be counted as experiencing homeless on any date between PSH move-in and the day prior to exit, regardless of other data.</li> </ul>
Rapid Re-Housing - RRH	Rapid Re-Housing projects. <ul style="list-style-type: none"> <li>▪ RRH clients who are homeless at project entry based on 3.917 Living Situation are considered to be experiencing homelessness until a documented 3.20 Housing Move-In Date or exit, whichever comes first.</li> </ul> For clients who were in ES/SH or on the street at project entry, all time between Approximate Date Started and move-in is counted in determining chronic homelessness. A client may not be counted as experiencing homeless on any date between RRH move-in and the day prior to exit, regardless of other data.

The LSA also provides information about patterns of system use prior to exit, destination types, and, for those who were served again later by continuum projects, lengths of time between exit and re-engagement or returns to homelessness.

In addition to providing information for the persons and households served during the report period, the LSA includes additional data about households and populations who exited the system in three distinct periods:

1. Those that exited two years prior to the report period
2. Those that exited one year prior to the report period
3. Those that exited in the first six months of the report period.

### Key LSA Concepts\*\*

\*\* Information from [An Introductory Guide to Submitting Longitudinal Systems Analysis \(LSA\) Data for the AHAR](#)

LSA Concept	Core Information Relevant to the LSA
<b>Adult and Child Household (AC)</b>	A household in which at least one household member is age 18 or older and at least one household member is age 17 or younger at entry or report start, whichever is later. AC households must include at least one adult and one child with valid dates of birth, but may also include household members of unknown age.
<b>Adult Only Household (AO)</b>	A household in which all household members have valid dates of birth and are age 18 or older at entry or report start, whichever is later.
<b>Child Only Household (CO)</b>	A household in which all household members have valid dates of birth and are age 17 or younger at entry or report start, whichever is later.
<b>Chronically Homeless</b>	<ul style="list-style-type: none"> <li>▪ A “homeless individual with a disability,” as defined in the Act, who:                             <ul style="list-style-type: none"> <li>▪ Lives in a place not meant for human habitation, a safe haven, or in an emergency shelter; and</li> <li>▪ Has been homeless (as described above) continuously for at least 12 months or on at least 4 separate occasions in the last 3 years where the combined occasions must total at least 12 months                                     <ul style="list-style-type: none"> <li>i. Occasions separated by a break of at least seven nights</li> <li>ii. Stays in institution of fewer than 90 days do not constitute a break</li> </ul> </li> </ul> </li> <li>▪ An individual who has been residing in an institutional care facility for fewer than 90 days and met all of the criteria in paragraph (1) of this definition, before entering that facility; or</li> <li>▪ A family with an adult head of household (or if there is no adult in the family, a minor head of household) who meets all of the criteria in paragraphs (1) or (2) of this definition, including a family whose composition has fluctuated while the head of household has been homeless.</li> </ul>
<b>Cohort</b>	A group of clients who meet the criteria for inclusion in reporting in a specific timeframe. See also “Exit Cohorts.”
<b>Emergency Shelter, Safe Haven, and Transitional Housing (ES/SH/TH)</b>	Residential project types in which all clients are homeless while enrolled. Demographics for clients served in these three project types are reported in the combined ES/SH/TH project group
<b>Enrollment</b>	A period in which a person receives services from a given project, beginning with the Project Start Date recorded in HMIS and ending on the Project Exit Date.
<b>Exit Cohorts</b>	Groups of households who exited from a continuum SO, ES, SH, TH, RRH, and/or PSH project in a given exit cohort period and have no record of any enrollment in an ES, SH, TH, RRH, and/or PSH project during the following 14 days. There are three exit cohort periods – and thus three exit cohorts – included in the LSA. Households that meet the criteria for inclusion in multiple exit cohorts are counted in each
<b>Household Served</b>	One or more clients served together in one or more continuum ES, SH, TH, RRH, and/or PSH projects at any time during the report period (or appropriate exit cohort period). Each household has a head of household and a distinct household type based on the ages of each household member.

	<ul style="list-style-type: none"> <li>▪ Heads of household served in multiple household types represent multiple households. For example, if Bob is served alone at age 17 at the beginning of the report period and also has a later enrollment at age 18, a total of two households are counted: one Child Only household and one Adult Only household.</li> <li>▪ At least one household is counted for each client designated as a head of household. For example, if Anna and Charles, both adults, are served together with one enrollment with Anna as the designated head of household and another with Charles as the designated head of household, a total of two Adult Only households are counted: one represented by Anna and one represented by Charles.</li> </ul>
<b>Permanent Supportive Housing (PSH)</b>	<p>Permanent supportive housing for formerly homeless people.</p> <ul style="list-style-type: none"> <li>▪ PSH clients who are homeless at project entry based on 3.917 Living Situation are considered to be experiencing homelessness until a documented 3.20 Housing MoveIn Date or exit, whichever comes first.</li> <li>▪ For clients who were in ES/SH or on the street at project entry, all time between Approximate Date Started and move-in is counted in determining chronic homelessness.</li> </ul> <p>A client may not be counted as experiencing homeless on any date between PSH move-in and the day prior to exit, regardless of other data.</p>
<b>Person Served</b>	A client served in one or more continuum ES, SH, TH, RRH, and/or PSH projects at any time during the report period.
<b>Population Groups</b>	People in households with one or more members who have specific characteristics that may indicate that the household has needs and/or eligibility for services that differ from the broader homeless population. The LSA summary and full datasets include population specific output for the following:
Unaccompanied Young Adult Household, 18- 24	An AO household in which the oldest adult in the household is between 18 and 24 at entry or report start, whichever is later.
Veteran Household	An AO or AC household in which any member of the household has a Veteran Status of 'Yes.'
Chronically Homeless Household	An AO, CO, or AC household in which the head of household or any adult in the household was identified as chronically homeless based on HMIS enrollments and self-reported time on the street or in ES/SH in the three years prior to their last active date in the report period.
Disabled Household	An AO, CO, or AC household in which the head of household or any adult in the household has a 'Yes' response to Disabling Condition associated with any enrollment active in the report period.
Seniors/55+ Households	An AO household in which all adults in the household are 55 or older at entry or report start, whichever is later.
First-time homeless	An AO, CO, or AC household that entered a continuum ES, SH, TH, RRH, or PSH project during the report period and was not enrolled in such projects at any point in the two years prior to entry.
<b>Project Group</b>	ES, SH, and TH (combined), RRH (only), and PSH (only). Demographics reporting for the active cohort is produced separately for each of these three project groups. People and households served in more than one project group are included in reporting for each group in which they were served.
<b>Rapid Re-housing (RRH)</b>	<p>Rapid Re-Housing projects.</p> <ul style="list-style-type: none"> <li>▪ RRH clients who are homeless at project entry based on 3.917 Living Situation are considered to be experiencing homelessness until a documented 3.20 Housing Move-In Date or exit, whichever comes first.</li> </ul>

	<ul style="list-style-type: none"> <li>▪ For clients who were in ES/SH or on the street at project entry, all time between Approximate Date Started and move-in is counted in determining chronic homelessness. A client may not be counted as experiencing homeless on any date between RRH move-in and the day prior to exit, regardless of other data.</li> </ul>
<b>Report Period</b>	<p>The time between the report start date and report end date report parameters. For official HUD submissions, the report period must be October 1 to September 30 of the following year. The report period determines which clients to include in the current cohort (those served in a project during the report period) and exit cohorts (those served in prior periods, whose returns are reported).</p>
<b>System Use</b>	<p>The distinct combination of project types in which a head of household has been enrolled during any continuous period of homelessness that overlaps with the report period, including enrollments prior to the start of the reporting period.</p>
