

Methodology for NY-511 - Binghamton, Union Town/Broome, Otsego, Chenango, Delaware, Cortland, Tioga Counties CoC

Sheltered Population Total

1. What data source(s) was used to produce the total number of people included in the sheltered population (staying in an emergency shelter, Safe Haven, or transitional housing) on the night of the count? Please indicate the percentage of the PIT count derived from each of the sources. (If a source was not used, please enter zero).

HMIS Data	90%
Provider-level surveys	10%
Client-level surveys	0%
Observation	0%
Other	0%
Total	100%

2. Was the CoC able to collect information about the number of people being sheltered on the night of the count from all emergency shelters, Safe Havens, and transitional housing projects listed on the HIC or only some? listed on your HIC or only some?

- Complete census count

3. What information or method(s) was used to de-duplicate the count of the total number of people included in the sheltered population?

- Comparison of unique client identifiers (not PII)

Sheltered Subpopulation

4. Looking at the change in your sheltered count from last year's count, please choose the three reasons you believe best explains these changes from the drop-down list below

- Change in PIT participation of programs serving general homeless populations (e.g., singles, families)
- Change in PIT count training
- Change in number of volunteers for PIT count

)

Please provide a brief description of these specific factors (500 word limit):

na

Unsheltered Population

5. What approach(es) was used to count the total number of people included in the unsheltered population during the PIT count? (select all that apply)

- "Night of the count" - census

5a1. Did you cover the entire geography of your CoC during the night of the count?

5a1a. What were the reasons you were unable to cover the entire geography (select all th

6. Were certain areas within the CoC geography specifically excluded because the CoC had reason to believe there were no unsheltered people in those areas based on prior knowledge/experience?

- Yes

7. Did the CoC adjust the information in some way (e.g., statistical adjustment or extrapolation) to areas within the CoC geography that were not canvassed but where unsheltered people might have been during the night of the PIT count?

- No

8. Were certain areas within the CoC geography specifically excluded because of concerns related to safety?

- No

- Comparison of unique client identifiers (not PII)
